Subject: *SOLVED* Quota inside vps on outside partition
Posted by n00b_admin on Mon, 09 Oct 2006 08:08:02 GMT

Hi,

I can't figure out why is this happening, i allowed access rw to a partition on the HN for a vps using the devnodes setting but i can't use quotas inside the vps on that partition.

My fstab file looks like this:

```
none   /dev/pts     devpts  rw     0 0
LABEL=/home   /home  ext3   defaults,usrquota,grpquota     1 2
```

And mtab like this:

```
/dev/simfs / reiserfs rw,usrquota,grpquota 0 0
proc /proc proc rw,nodiratime 0 0
devpts /dev/pts devpts rw 0 0
ext3 /home ext3 rw 0 0
```

I see that the partition is not mounted according to fstab

Does someone else tried this before ?

Quotacheck complaints about the mountpoint.

Thanks in advance for your reply.
