1. are you running mysql inside VE?
2. what kernel do you use?
uname -a

3. I need files content.
cat /proc/user_beancounters > bc1
doesn't generate output on the screen (if no error), but saves it to file 'bc1'. Are you trying to say, that file bc1 is empty?

Same for files "bc2" and "out".

Can you provide an access to the node? it will be quicker...
