My /proc/user_beancounters

Version: 2.5

uid resource	held	maxheld	barrier	limit	failcnt
103: kmemsize	639423	936483	2752512	2936012	0

numiptent	10	10	128	128	0

So it looks that there is a problem with othersockbuf and dgramrcvbuf. May I change this parameters without restart the VPS? May I disable all quotas for testing without shutdown?

Thanks.
