To get rid of venet device look at these thread
http://forum.openvz.org/index.php?t=tree&th=270&mid= 1489&&rev=&reveal=

However the presense of venet device should not break network connectivity.
Quote:Logged into VPS 104, I cannot ping the HN or the other, regular VPSs. Logged into the HN, I likewise cannot ping VPS 104.
Can you ping anyone else in network?
Please, do ifconfig -a and route -nv in VE and on HN and post the results here.

Thanks!
