rudal wrote on Mon, 16 October 2006 18:55John, first of all, I would ask you if you understand the question that I initially posted in this forum. Secondly, I am sorry but I dont do fun posting. Thirdly, you are not respecting my posting by making that statement. If you think this topic is some sort of a joke to you, please do not even view this posting.

Earlier you said "10.2.5.2 lives on eth1 in the same physical server." And now you say:

eth1 Link encap:Ethernet HWaddr 00:0E:0C:7F:0E:D6
inet addr:10.2.4.124 Bcast:10.2.7.255 Mask:255.255.252.0

You keep changing the information and contradicting yourself. Sorry, but I have no more time for that.
