Earlier you said "10.2.5.2 lives on eth1 in the same physical server." And now you say:

eth1 Link encap:Ethernet HWaddr 00:0E:0C:7F:0E:D6
inet addr:10.2.4.124 Bcast:10.2.7.255 Mask:255.255.252.0

You keep changing the information and contradicting yourself. Sorry, but I have no more time for that.

You are not understanding it again, if you have no time for this, that's fine john. I respect that and I apologize also if my statement is incomprehensible to you. Anyway, I do not want to prolong this debate and I rather move on with anything that I found out so far.
