Hello.

Can I split /vz into /vz1, /vz2, ... etc. Reason is, for example, 3 or 4 hard drives in the system. I try to do it but got error

```
hosting:~# vzctl start 201
```

```
Starting VPS ...
```

```
vzquota : (warning) Incorrect quota shutdown for id 201, recalculating disk usage
```

```
vzquota : (error) quota check : stat /vz/private/201: No such file or directory
```

```
vzquota on failed [1]
```

```
hosting:~# cat /etc/vz/201.conf | grep /vz
```

```
VE_ROOT="/vz2/root/$VEID"
```

```
VE_PRIVATE="/vz2/private/$VEID"
```

any suggestions?

PS: for testing reasons /vz and /vz2 on the same file system
