---

I'm working on a project for school. I evaluated a demo license for virtuoizzo before, and I got very interested!

I also tested OpenVZ and I am very happy with what it can do.

What I would like to know is, if there's a possibility to intergrate Plesk into OpenVZ? Do the license keys work? Are there disadvantages using it in OpenVZ?

I can't wait to test out some more.

Thank you in advance for you fast reply.
