I'll knew, that openvz project is focused to Redhat, and some Redhat system.

But maybe with a view of compatibility it would be quite good to change in file /etc/init.d/vz

this

```
# Source function library.
. /etc/rc.d/init.d/functions
```

to something like that:

```
# Source function library.
if [ -f /etc/init.d/functions ]; then
  . /etc/init.d/functions
elif [ -f /etc/rc.d/init.d/functions ; then
  . /etc/rc.d/init.d/functions
else
  echo "Could not find functions file.  Exiting."
  exit 1
fi
```
