Hi all,

Well I have this problem with two different servers, my kernel is:  
2.6.8-022stab078.14-smp

I have working the quotas but some day the quotas don't work. And I can't create users using cPanel or DirectAdmin.

Sometimes I fixed it doing that:

```
vzctl stop VID  
vzquota drop VID  
vzctl start VID
```

But now does not work. I don't know what more to do.

Thanks
