Im using FC4 in all my VE,

when I type:

```
root@abraham [/scripts]# quotacheck -avug
```

```
quotacheck: Quota for users is enabled on mountpoint / so quotacheck  
might damage the file.
```

Please turn quotas off or use -f to force checking.

And I tried quota (user) for all users and I get:

```
root@abraham [/home]# quota lealanga
```

```
Disk quotas for user lealanga (uid 32138): none
```

```
root@abraham [/home]# quota aposada
```

```
Disk quotas for user aposada (uid 32010): none
```

> please strace edquota
