Subject: Re: software raid on Fedora core 6 and OpenVZ
Posted by dev on Mon, 20 Nov 2006 20:37:33 GMT

.config from 2.6.18-ovz:
CONFIG_MD_RAID456 is not set
it looks like the option name was changed (there were separate options for RAID 4,5,6) and this caused it to be lost.
please, recompile a kernel with this options set.

I added bug:
http://bugzilla.openvz.org/show_bug.cgi?id=360
so that next kernel will have a fix.
