Quote:Vps starts but when i login i am not able to ping or connect to any host.

First, you should use *real* IP address for you VPS, if you want to be able to access internet from it.

Second, you probably missed setting nameserver inside a VPS.

Quote:Running: /usr/lib/vzctl/scripts/vps-net_add
arpsend: unknown iface eth : No such device
vps-net_add WARNING: arpsend -c 1 -w 1 -D -e 1.1.1.7 eth FAILED

Can you please execute the following like and post its output here?
. /usr/lib/vzctl/scripts/vps-functions && vzgetnetdev && echo $NETDEVICES
