Subject: No bash history in VE

Hi,

When I enter a machine with vzctl enter <NAME>, not all environment variables are set.
I have read that OpenVZ devs see vzctl enter as last ressort to enter a machine, but I would still like to use it as a normal way.

For example:
HISTFILE=/dev/null

after a su - :
HISTFILE=/root/.bash_history

What does su - do?
Disadvantage of su is, that I have to type exit twice.

Any ideas?
