kir wrote on Tue, 17 January 2006 16:24It is not clear whether you should use NAT or not - I do not know your network setup...

Some networking problems are caused by the fact that ppl forgot to enable IP forwarding (net.ipv4.ip_forward = 1). For details, see Quick Install document.

My network is:

Private LAN: 1.1.1.0/28
Gateway: 1.1.1.14
OpenVZ: 1.1.1.11
VPS 777: 1.1.1.7
