Subject: looking for a script to restart an VE via a website (controlpanel or something)
Posted by glowfish on Tue, 26 Dec 2006 18:44:16 GMT

Hello,

i am looking for a script where it is possible to reboot your VE from a website.

I.e. Customer logs into a website. He checks a box "reboot ve" and the ve restarts within the next few seconds.

Is there anything like that existing ?

Regards
Daniel
