
Subject: OpenVZ fails to start in Debian Etch
Posted by [zenny](#) on Mon, 08 Jan 2007 11:51:41 GMT

I installed openvz in a debian etch as described at
http://wiki.openvz.org/Installation_on_Debian#Etch_.28testing.29

But openvz fails when I execute /etc/init.d/vz start

Any pointers?

However, on a server running centos4.4, openvz gets installed very easily.
