when I try to run the /etc/init.d/vz start then it gives an output:

```
# /etc/init.d/vz start  
Starting OpenVZ: ..failed
```

That's it. I consulted another thread with the similar problem with Debian 3.2 but the problem does not seem to match with mine! The reference thread is
http://forum.openvz.org/index.php?t=tree&goto=7741&&srch=debian+etch#msg_7741

Thanks
