Sorry for the late response.

I just ran a test. I had one VE with a 14MB wtmp file

Here is my output of last

reboot system boot 2.6.16-026test01 Wed Jan 10 05:10 (00:00)reboot system boot 2.6.16-026test01 Tue Jan 9 06:49 (22:20)

wtmp begins Tue Jan 9 06:49:50 2007

I restarted the VE and the wtmp file still remains at 14MB.

Any ideas?
