Subject: Re: OpenVZ - Segmentation fault - CPANEL
Posted by rickb on Thu, 11 Jan 2007 14:05:24 GMT

Hi, its not possible for anyone to help you with the information you have provided.

Quote:NODE have "Segmentation fault".
can you be more specific? What application is hitting seg fault? Can you provide strace?

Quote:This no permit access via SSH
access to HN or VE?

Quote:create new vm
provide build details, the command you are running, and strace of the build

Also:
+your kernel version
+your vzctl version
