rickb wrote on Tue, 16 January 2007 21:48Hi.

+Are you booted into the VZ kernel (uname -a)
+Is VZ started? (/etc/init.d/vz status/start)

Rickb, hope this is the info you need. Thanks for your reply!

```
debian:~# uname -a
Linux debian 2.6.18-1-openvz #1 Tue Jan 16 10:22:13 EST 2007 i686 GNU/Linux
debian:~# /etc/init.d/vz status
OpenVZ is stopped.
debian:~# /etc/init.d/vz start
Starting OpenVZ: ..failed
debian:~#
```
