Issue was due to running Ubuntu 6.10 Edgy as the guest. I tried re-symlinking <mountdir>/bin/sh to bash instead of dash but this did not help. Perhaps is due to Edgy using upstart daemon instead on regular init.

Soon as I tried Debian sarge as guest it worked fine.

Subject: Re: [Users] vzctl start id "VE start in progress", vzctl status"VEID exist mounted down", vzctl enter "VE is not running"

Stephen,

Is there anything in dmesg?

Thanks,
Kirill
