Subject: openvz webpanel Fehler
Posted by informant on Fri, 25 Nov 2011 16:02:50 GMT

Hi, since last time, we have in ovz panel a information in statusbar, thats a backup was created (running), but we don´t have start an backup and no backup prozess run on host server.
how can i get the normal statusbar without false status?
do you have an idea?
thanks

I think someone should contact the "OpenVZ Web Panel" project and politely ask them to change their name or to atleast clearly state somewhere that their project doesn't have any direct connection with OpenVZ itself.

If I see correctly, they even stole the logo?
