I set the password of ssh for vps more than 9 characters. Sure , I can ssh with a password that was set up.

However, it can not be the first nine letters as well.

How can I fix it use only the password I set only.

exp. passwd is abcd0123456789

I can use "abcd0123456789" and "abcd01234" login to ssh

Main OS : CentOS 5 x86_64

Template : CentOS 5 x86_64

same problem every client.

Many Thanks
