
Subject: vzquota : (error) Quota on syscall for 777: No such file or directory

Posted by [pivert](#) on Sun, 27 Aug 2006 22:26:47 GMT

[View Forum Message](#) <> [Reply to Message](#)

Hello,

I have two openvz servers, but on one server, I have an error with quotas. When I start the VM, I have :

```
serveur ~ # vzctl start 777
```

```
Starting VPS ...
```

```
vzquota : (error) Quota on syscall for 777: No such file or directory
```

```
vzquota on failed [3]
```

I can start the VM if I disable the quota in vz.conf

Using sys-cluster/vzctl-3.0.10-r2, vzquota-3.0.8
and kernel 2.6.16-026test015.

Here is what I have in my kernel :

```
Quote:serveur ~ # gzcat /proc/config.gz | grep 'VZ|QUOTA'
```

```
# CONFIG_XFS_QUOTA is not set
```

```
CONFIG_QUOTA=y
```

```
# CONFIG_QUOTA_COMPAT is not set
```

```
CONFIG_VZ_QUOTA=m
```

```
# CONFIG_VZ_QUOTA_UNLOAD is not set
```

```
CONFIG_VZ_QUOTA_UGID=y
```

```
CONFIG_QUOTACTL=y
```

```
# OpenVZ
```

```
CONFIG_VZ_WDOG=m
```

```
serveur ~ #
```

What could I check ?

Regards,

What kernel,vzquota and vzctl version do you use?
Thanks.

Hi,

Sorry, do I need any particular folder to store the quotas ?

I just followed the howto generate a Gentoo VM from stage3 in the Wiki.

Regards,

Hi,

yes, you need a folder, where the quota-files are stored,
i doesn't really know where the g2 set the var-folder of "vzquota"

Please take a look in the vzquota-src:
If variable "VARDIR" is set to "/var", than vzquota-var-folder is "/var/vzquota".

or "strace vzquota show <veid> 2>&1 | grep open"

... on a debian host (as a example)

```
open("/etc/ld.so.preload", O_RDONLY) = -1 ENOENT (No such file or directory)
open("/etc/ld.so.cache", O_RDONLY)   = 3
open("/lib/libc.so.6", O_RDONLY)     = 3
open("/var/lib/vzquota/quota.<veid>", O_RDWR|O_LARGEFILE) = 3
```

show's me, vzquota, opens a file in folder "/var/lib/vzquota" folder, reading the quota.<veid> stats.file!

[View Forum Message](#) <> [Reply to Message](#)

Hi,

Just checked, the folder(and the quota file) are presents :

```
serveur ~ # vzctl start 777
Starting VPS ...
vzquota : (error) Quota on syscall for 777: No such file or directory
vzquota on failed [3]
serveur ~ # vzquota show 777
  resource      usage      softlimit    hardlimit    grace
  1k-blocks     497308      1048676      1153534
  inodes        36200       200100       220100
serveur ~ # vi /var/vzquota/quota.777
serveur ~ # ls -l /var/vzquota/quota.777
-rw----- 1 root root 131 2006-08-27 23:54 /var/vzquota/quota.777
serveur ~ #
```

BTW,
I created a vm such as described in :
http://gentoo-wiki.com/HOWTO_OpenVZ
And the vm starts without any problem.

So the problem is probably not in openvz, but in the way I created the VM. I followed the guide :
http://wiki.openvz.org/Gentoo_template_creation

Hi,

ok, the quota.files exist, but please start the ve with --verbose mode, so you can see more information about the start process.

```
$ vzctl --verbose start 777
```

Subject: Re: vzquota : (error) Quota on syscall for 777: No such file or directory

[View Forum Message](#) <> [Reply to Message](#)

Here are when I launch my vms.

777 is the vm that I want to create myself (from http://wiki.openvz.org/Gentoo_template_creation)

101 is a gentoo vm that I downloaded (as explained in http://gentoo-wiki.com/HOWTO_OpenVZ)

The problem is only on the 777. The 101 starts.

It looks like there is smth missing in 777.

```
serveur private # vzctl --verbose start 777
```

```
Unable to open /usr/lib/vzctl/modules/: No such file or directory
```

```
Starting VPS ...
```

```
Running: /usr/sbin/vzquota show 777
```

```
Running: /usr/sbin/vzquota on 777 -r 0 -b 1048676 -B 1153534 -i 200100 -l 220100 -e 0 -n 0 -s 0
```

```
vzquota : (error) Quota on syscall for 777: No such file or directory
```

```
vzquota on failed [3]
```

```
serveur private # vzctl --verbose start 101
```

```
Unable to open /usr/lib/vzctl/modules/: No such file or directory
```

```
Starting VPS ...
```

```
Running: /usr/sbin/vzquota show 101
```

```
Running: /usr/sbin/vzquota on 101 -r 0 -b 1048676 -B 1153534 -i 200100 -l 220100 -e 0 -n 0 -s 0
```

```
Mounting root: /mnt/files/vz/root/101 /mnt/files/vz/private/101
```

```
VPS is mounted
```

Hi Pivert,

```
> serveur private # vzctl --verbose start 777
```

```
>Unable to open /usr/lib/vzctl/modules/: No such file or directory
```

```
... create this dir and the error is done, bug filled, but no response yet
```

```
(http://bugzilla.openvz.org/show\_bug.cgi?id=198)
```

```
>Starting VPS ...
```

```
>Running: /usr/sbin/vzquota show 777
```

```
>Running: /usr/sbin/vzquota on 777 -r 0 -b 1048676 -B 1153534 -i >200100 -l 220100 -e 0 -n 0 -s 0
```

```
>vzquota : (error) Quota on syscall for 777: No such file or >directory
```

```
>vzquota on failed [3]
```

... where is the root and private folder of this ve ???

Is see no mount process for this one, please poste the config of ve 777!

```
>serveur private # vzctl --verbose start 101
>Unable to open /usr/lib/vzctl/modules/: No such file or directory
>Starting VPS ...
>Running: /usr/sbin/vzquota show 101
>Running: /usr/sbin/vzquota on 101 -r 0 -b 1048676 -B 1153534 -i 200100 -l 220100 -e 0 -n 0 -s 0
>Mounting root: /mnt/files/vz/root/101 /mnt/files/vz/private/101
>VPS is mounted
```

All done, no error ... perfect!

[View Forum Message](#) <> [Reply to Message](#)

This is on ext3 :
serveur ~ # mount | grep /mnt/files
/dev/md/4 on /mnt/files type ext3 (rw)

But the openvz vm that works is on the same fs...

The only difference regarding the howto, is that I used a Stage3 2006.1 instead of 2006.0. This evening, I will retry with the 2006.0 stage3...

Regards,

Subject: Re: vzquota : (error) Quota on syscall for 777: No such file or directory
Posted by [pivert](#) on Tue, 29 Aug 2006 20:25:31 GMT
[View Forum Message](#) <> [Reply to Message](#)

Mhh.. Sorry,

I used the stage3 2006.0 for the 777.
So I downloaded the stage3 again and made an other vm 701.
And this time, it works. I don't know the reason.

```
serveur private # ls -l 701/stage3-i686-2006.0.tar.bz2
-rw-r--r-- 1 root root 104949773 2006-08-29 22:08 701/stage3-i686-2006.0.tar.bz2
serveur private # ls -l 777/stage3-i686-2006.0.tar.bz2
-rw-r--r-- 1 root root 104949773 2006-08-27 23:38 777/stage3-i686-2006.0.tar.bz2
```

Really sorry for such an annoyance... I don't know what I miss in the 777vm ?!

I remade all the howto on the 777vm, but it still doesn't work.
However simply renaming the folder allowed me to start it :

```
serveur lib # vzctl start 777
Starting VPS ...
vzquota : (error) Quota on syscall for 777: No such file or directory
vzquota on failed [3]
serveur lib # cd ..
serveur 777 # cd ..
serveur private # ls
101 701 702 777
serveur private # mv 777 703
serveur private # vzctl set 703 --applyconfig vps.basic --save
Saved parameters for VPS 703
serveur private # vzctl start 703
Warning: distribution not specified default used /etc/vz/dists/default
Starting VPS ...
Initializing quota ...
VPS is mounted
Setting CPU units: 1000
VPS start in progress...
serveur private #
```

Regards,

Posted by [pivert](#) on Tue, 29 Aug 2006 20:36:28 GMT
[View Forum Message](#) <> [Reply to Message](#)

The incredible is that if I go back to 777 folder, this fails again :

```
serveur private # rm /etc/vz/conf/777.conf
serveur private # mv 703 777
serveur private # vzctl set 777 --applyconfig vps.basic --save
Saved parameters for VPS 777
```

```
serveur private # vzctl start 777
Warning: distribution not specified default used /etc/vz/dists/default
Starting VPS ...
vzquota : (error) Quota on syscall for 777: No such file or directory
vzquota on failed [3]
serveur private #
```

Very strange isn't it ?

Here's what worked for me: after I've moved vm from /vz/private/24 to /mnt/sdb/vz/private/24 I was getting the same message.
Deleting /var/vzquota/vzquota.24 and reboot the root machine solved the problem. Valmont, thanks for your suggestion!
