Is there a way to load modules inside a VE to access external devices and file systems?

loading kernel modules from VE doesn't seem to be available due to obvious security issues:

forum.openvz.org/index.php?t=msg&goto=36148&

forum.openvz.org/index.php?t=msg&goto=32921&

you can however load modules on the Hardware Node and then use devices from inside the VE.
Try using `vzctl set --devnodes` or `--devices`.

(occasionally some ref here:

forum.openvz.org/index.php?t=msg&goto=10657&

)
