Hi,

I just discovered problems when using srptables on a bridge the veth of the VE and the eth of the hw-node are connected to.

is there anything known about arptables and OpenVZ ??

Thank you

Fabian

what kind of problems?

AFAIR arptables are simply not included in binary kernel.

did you recompile it yourself?

Kirill

Kirill,

.....

> did you recompile it yourself?

Yes, i did.

Unfortunately the options for arptables are spread, so i missed the correct configuration with the first try :-(

Correctly building the kernel helped a lot ;-)

Thanks for your support.

Fabian
