Hi,

started by cron, I do vzdump my VE 184:

```
/usr/sbin/vzdump --compress --dumpdir /mnt/stor1/raid5array1/backup/vzdump --suspend  
--bwlimit 999999 --maxfiles 3 184
```

The log from the script shows:

```
INFO: starting new backup job: vzdump --compress --dumpdir  
/mnt/stor1/raid5array1/backup/vzdump --suspend --bwlimit 999999 --maxfiles 3 184  
INFO: Starting Backup of VM 184 (openvz)  
INFO: CTID 184 exist unmounted down  
INFO: status = CTID 184 exist unmounted down  
INFO: backup mode: stop

INFO: archive file size: 703MB  
INFO: Finished Backup of VM 184 (00:02:48)  
INFO: Backup job finished successfuly
```

but the log from vzdump at the backup dir shows:

```
Dec 27 04:30:16 INFO: Starting Backup of VM 184 (openvz)

```

Why are the dates different? The system time of the VE's is synced to ntp Server also the VE's node and the backup server.

vzdump version is 1.2-5

best regards
Frank
