

Hi,

after the upgrade to the new vzctl 3.1-1
I see this message:

warning: /etc/vz/vz.conf created as /etc/vz/vz.conf.rpmnew

I need take some consideration?
I'm using 2.6.18-308.el5.028stab099.3

Thanks

It's not just when upgrading vzctl, this can happen when upgrading any rpm on your server that contains configuration files.

This is a fairly basic question about server administration... Compare the contents of these two files for starters and go from there.
