Subject: [PATCH 00/10] NFS: callback threads containerization  
Posted by [Stanislav Kinsbursky](#) on Thu, 26 Apr 2012 15:54:51 GMT  
[View Forum Message](#) <> [Reply to Message](#)

---

This patch set depened on "SUNRPC: separate per-net data creation from service creation" patch set sent earlier.

The following series consists of:

---

Stanislav Kinsbursky (10):

NFS: pass net to nfs\_callback\_down()  
NFS: callback service creation function introduced  
NFS: move per-net callback thread initialization to nfs\_callback\_up\_net()  
NFS: callback up - transport backchannel cleanup  
NFS: callback service start function introduced  
NFS: callback up - users counting cleanup  
NFS: make nfs\_callback\_tcpport per network context  
NFS: make nfs\_callback\_tcpport6 per network context  
NFS: callback per-net usage counting introduced  
NFS: add debug messages to callback down function

Subject: [PATCH 02/10] NFS: callback service creation function introduced  
Posted by Stanislav Kinsbursky on Thu, 26 Apr 2012 15:55:06 GMT

[View Forum Message](#) <> [Reply to Message](#)

This function creates service if it's not exist, or increase usage counter of the existent, and returns pointer to it.

Usage counter will be droppepd by svc\_destroy() later in nfs\_callback\_up().

Subject: [PATCH 03/10] NFS: move per-net callback thread initialization to  
nfs\_callback\_up\_net()

Posted by [Stanislav Kinsbursky](#) on Thu, 26 Apr 2012 15:55:13 GMT

[View Forum Message](#) <> [Reply to Message](#)

This new function is now called before nfs\_minorversion\_callback\_svc\_setup()).

Also few small changes:

- 1) current network namespace in nfs\_callback\_up() was replaced by transport net.
- 2) svc\_shutdown\_net() was moved prior to callback usage counter decrement (because in case of per-net data allocation failure svc\_shutdown\_net() have to be skipped).

Subject: [PATCH 04/10] NFS: callback up - transport backchannel cleanup  
 Posted by [Stanislav Kinsbursky](#) on Thu, 26 Apr 2012 15:55:20 GMT

[View Forum Message](#) <> [Reply to Message](#)

No need to assign transports backchannel server explicitly in

nfs41\_callback\_up() - there is nfs\_callback\_bc\_serv() function for this.  
By using it, nfs4\_callback\_up() and nfs41\_callback\_up() can be called without transport argument.

Note: service have to be passed to nfs\_callback\_bc\_serv() instead of callback, since callback link can be uninitialized.

Subject: [PATCH 05/10] NFS: callback service start function introduced

Posted by [Stanislav Kinsbursky](#) on Thu, 26 Apr 2012 15:55:27 GMT

[View Forum Message](#) <> [Reply to Message](#)

This is just a code move, which from my POW makes code looks better.

I.e. now on start we have 3 different stages:

- 1) Service creation.
- 2) Service per-net data allocation.
- 3) Service start.

Patch also renames goto label "out\_err:" into "err\_start:" to reflect new changes.

Subject: [PATCH 06/10] NFS: callback up - users counting cleanup  
Posted by Stanislav Kinsbursky on Thu, 26 Apr 2012 15:55:34 GMT

[View Forum Message](#) <> [Reply to Message](#)

---

Usage counter now increased only if the service was started successfully.  
Even if service is running already, goto is not required anymore, because  
service creation and start will be skipped.  
With this patch code looks clearer.

Subject: [PATCH 09/10] NFS; callback per-net usage counting introduced  
 Posted by [Stanislav Kinsbursky](#) on Thu, 26 Apr 2012 15:55:56 GMT  
[View Forum Message](#) <> [Reply to Message](#)

---

This patch also introduces refcount-aware nfs\_callback\_down\_net() wrapper for svc\_shutdown\_net().
