Hi,

i get an error after openvz server restart:

/etc/rc3.d/S99local: line 9: /proc/sys/net/bridge/bridge-nf-call-iptables no such file or directory

The server hangs and i get highload. Only ssh login works very slow.

Anbody know how to solve the problem?

Could you provide some additional information, such as which OS are you using, which openvz kernel version have you used before and which are you booting to now, which vzctl version do you use..?

And also:

ls -als /proc/sys/net/bridge

cat /etc/rc3.d/S99local

cat /etc/sysctl.conf
