I don't think the mirror are getting the latest version.

http://openvz.hitme.net.pl/current/ploop-lib-1.3-1.x86_64.rpm: [Errno -1] Package does not match intended download. Suggestion: run yum --enablerepo=openvz-utils clean metadata

I experience the same with yum install vzctl

And the list of mirrors keeps going on without success.

I tried yum clean all

What is going wrong?

A temporary solution:

(apparently, I can't post links until I have posted more than 10 messages, so these instructions aren't entirely copy / pastable- sorry you can find the base repo in /etc/yum.repos.d in the openvz.repo file - 3rd line down)

```
yum install ploop
```

```
wget path_to_rpm_@openvz/vzctl-3.3-1.x86_64.rpm
```

```
wget path_to_rpm_@openvz/vzctl-lib-3.3-1.x86_64.rpm
```

```
rpm -Uvh vzctl*
```

Looks like something is wrong with the repo?

Jonathan.
