Subject: updating nfs docs?

Hi again all,

I hit this issue (twice, due to PEBKAC) in trying to configure a container as an NFS client. I was using the docs here:

[http://wiki.openvz.org/NFS\\_doesn%27t\\_work](http://wiki.openvz.org/NFS_doesn%27t_work)

and, being somewhat older, of course knew immediately what "Portmap is not running on the NFS client" meant, but had forgotten (twice, more PEBKAC!) that rpcbind is replacing the portmapper, and for newer distros rpcbind, not portmap, needs to be running. Is it kosher for me to modify the wiki to say "portmap or rpcbind" on this page?

Thanks,

--keith
