
Subject: yum error trying to update vzctl
Posted by [Rene Dokbua](#) on Mon, 11 Jun 2012 12:32:20 GMT
[View Forum Message](#) <> [Reply to Message](#)

Trying to run a 'yum update' I got some strange yum error. I narrowed it down to being caused by vzctl. It installed fine on another very similar server so it seems something has gone belly up on this server, not sure what though.

During the failure it suggests running "yum --enablerepo=openvz-utils clean metadata" so I start by doing that:

```
# yum --enablerepo=openvz-utils clean metadata
Loaded plugins: presto
Cleaning repos: openvz-kernel-rhel6 openvz-utils rpmforge sl sl-security
15 metadata files removed
5 sqlite files removed
0 metadata files removed
# yum update vzctl
Loaded plugins: presto
openvz-kernel-rhel6

Total size: 1.0 M

Total download size: 337 k

Is this ok [y/N]: y

Downloading Packages:
Setting up and reading Presto delta metadata
Processing delta metadata
Package(s) data still to download: 337 k
(1/2): vzctl-3.3-1.x86_64.rpm
| 228 kB 00:00
http://download.openvz.org/current/vzctl-3.3-1.x86_64.rpm: [Errno -1]
Package does not match intended download. Suggestion: run yum
--enablerepo=openvz-utils clean metadata
Trying other mirror.
(1/2): vzctl-3.3-1.x86_64.rpm
| 228 kB 00:00
http://openvz-mirror1.rapidvps.com/current/vzctl-3.3-1.x86_64.rpm: [Errno -1]
Package does not match intended download. Suggestion: run yum
--enablerepo=openvz-utils clean metadata
Trying other mirror.
(1/2): vzctl-3.3-1.x86_64.rpm
| 228 kB 00:01
http://ftp.iij.ad.jp/pub/openvz/current/vzctl-3.3-1.x86_64.rpm: [Errno -1]
Package does not match intended download. Suggestion: run yum
--enablerepo=openvz-utils clean metadata
Trying other mirror.

After this it just keeps looping through mirrors.

What does this error mean? This server runs Centos 6-64 so it should be the correct rpm.

I have fixed it. Sorry for the trouble, something is wrong with my upload scripts, will find it out when back from vacation.
