is there any complete guide how to create a custom template for openvz
i know there is one in the wiki. but for example i want to create a custom template with mysql, and
as you know it asks for a password upon install

...

thanks in advance

Here is one example of how to create an openvz template with direct admin pre-installed on it:

Oh, I just noticed that I cannot post links yet since i don't have 10 posts.

Just google search for the following:
openvz-template-with-directadmin

It's a blog post on 'iwebservice' site.
