Subject: vzctl: race condition at open("/sbin/init")

Hi,

stat() + open() is not atomic in the code below, so there is a race condition. A container root may change /sbin/init between these calls to e.g. FIFO and then make the vzctl's process hang up on read().

I'd add O\_NOCTTY to open's flags and change stat() before open() to fstat() just after open().

vzctl-3.3/src/lib/readelf.c:

```
int get_arch_from_elf(const char *file)
{
...
if (stat(file, &st)) <<<<
    return -1;
if (!S_ISREG(st.st_mode))
    return -1;
fd = open(file, O_RDONLY); <<<<
if (fd < 0)
    return -1;
 nbytes = read(fd, (void *) &elf_hdr, sizeof(elf_hdr));
...
}
```

Thanks,

--  
Vasily

Thanks a lot for reporting!

Does this patch seems sufficient to you?

<http://git.openvz.org/?p=vzctl;a=commitdiff;h=7c47a7953>

Yes, look good.

Thanks!
