## Subject: [PATCH v4 0/9] IPC: checkpoint/restore in userspace enhancements Posted by Stanislav Kinsbursky on Mon, 13 Aug 2012 12:31:30 GMT

View Forum Message <> Reply to Message

## v4:

- 1) If MSG\_COPY flag is specified, then "mtype" is not a type, but message number to copy.
- 2) MSG\_SET\_COPY logic for sys\_msgctl() was removed.

## v3:

1) Copy messages to user-space under spinlock was replaced by allocation of dummy message before queue lock and then copy of desired message to the dummy one instead of unlinking it from queue list.

I.e. the message queue copy logic was changed: messages can be retrived one by one (instead of receiving of the whole list at once).

This patch set is aimed to provide additional functionality for all IPC objects, which is required for migration of these objects by user-space checkpoint/restore utils (CRIU).

The main problem here was impossibility to set up object id. This patch set solves the problem in two steps:

- 1) Makes it possible to create new object (shared memory, semaphores set or messages queue) with ID, equal to passed key.
- 2) Makes it possible to change existent object key.

Another problem was to peek messages from queues without deleting them. This was achived by introducing of new MSG\_COPY flag for sys\_msgrcv() and MSG\_SET\_COPY command for sys\_msgctl() (which can be used to select message number to copy).

The following series implements...

---

## Stanislav Kinsbursky (9):

ipc: remove forced assignment of selected message

ipc: "use key as id" functionality for resource get system call introduced

ipc: segment key change helper introduced

ipc: add new SHM SET command for sys shmctl() call

ipc: add new MSG\_SET command for sys\_msgctl() call

ipc: add new SEM\_SET command for sys\_semctl() call

IPC: message queue receive cleanup

IPC: message queue copy feature introduced

test: IPC message queue migration test

Hi, Andrew.

Looks like there are no objections against this patch set.

Will you take it?
