Subject: install 64bit vps on node runnig 32bit
Posted by eslam on Tue, 25 Sep 2012 01:25:31 GMT

hello ,

iam trying to creat a vps with operating system using 64bit template on my actually running node
with centos 32bit one but i received this error please` see

root@CentOS-54-32-minimal # vzctl start 122
Starting container ...
Container is mounted
Adding IP address(es): 188.40.14.187
Setting CPU limit: 800
Setting CPU units: 1000
Setting CPUs: 8
Unable to start init, probably incorrect template
Container start failed
Stopping container ...
Container was stopped
Container is unmounted
root@CentOS-54-32-minimal #

is there is any way to over come this knowing my server processor actually supports 64bit

how shall i make this work ?

you have to reinstall your centos, but this time x64 version
-- it's the only way
