
Subject: [RFC PATCH 0/5] IPC: CRIU enhancements update
Posted by [Stanislav Kinsbursky](#) on Fri, 26 Oct 2012 11:05:38 GMT
[View Forum Message](#) <> [Reply to Message](#)

This patch set is aimed to fix some errors in previously committed "[RFC PATCH v8 0/5] IPC: checkpoint/restore in userspace enhancements" patch set.

Is particular it:

- 1) wraps new sysctl in CONFIG_CHECKPOINT_RESTORE macro and updates documentation
- 2) fixes self-test to work with new sysctls.
- 3) cleanup do_msgrcv() to make it looks less ugly around MSG_COPY feature.

The following series implements...

Stanislav Kinsbursky (5):

ipc: wrap new sysctls for CRIU inside CONFIG_CHECKPOINT_RESTORE
ipc: remove redundant MSG_COPY check
test: IPC message queue copy feature test update
Documentation: update sysctl/kernel.txt
ipc: cleanup do_msgrcv() around MSG_COPY feature

Subject: [PATCH 1/5] ipc: wrap new sysctls for CRIU inside
CONFIG_CHECKPOINT_RESTORE
Posted by [Stanislav Kinsbursky](#) on Fri, 26 Oct 2012 11:05:57 GMT
[View Forum Message](#) <> [Reply to Message](#)

This patch set wraps "msg_next_id", "sem_next_id" and "shm_next_id" inside CONFIG_CHECKPOINT_RESTORE macro.

Subject: [PATCH 3/5] test: IPC message queue copy feature test update
 Posted by Stanislav Kinsbursky on Fri, 26 Oct 2012 11:06:07 GMT

[View Forum Message](#) <> [Reply to Message](#)

This update fixes coding style problems (80-characters line and others).
 Also, it fixes test to work with new IPC sysctls (instead of using experimental API logic, which was thrown away and replaced by sysctls).

Signed-off-by: Stanislav Kinsbursky <skinsbursky@parallels.com>

Subject: [PATCH 4/5] Documentation: update sysctl/kernel.txt
Posted by [Stanislav Kinsbursky](#) on Fri, 26 Oct 2012 11:06:12 GMT
[View Forum Message](#) <> [Reply to Message](#)

This patch adds documentation about new "msg_next_id", "sem_next_id" and "shm_next_id" sysctls.

+msg_next_id, sem_next_id, and shm_next_id:
+
+These three toggles allows to specify desired id for next allocated IPC
+object: message, semaphore or shared memory respectively.
+

+By default they are equal to -1, which means generic allocation logic.

+Possible values to set are in range {0..INT_MAX}.

+

+Notes:

+1) kernel doesn't guarantee, that new object will have desired id. So,
+it's up to userspace, how to handle an object with "wrong" id.

+2) Toggle with non-default value will be set back to -1 by kernel after
+successful IPC object allocation.

Subject: [PATCH 5/5] ipc: cleanup do_msgrcv() around MSG_COPY feature

Posted by [Stanislav Kinsbursky](#) on Fri, 26 Oct 2012 11:06:17 GMT

[View Forum Message](#) <> [Reply to Message](#)

MSG_COPY feature was developed for Checkpoint/Restart In User space project
and thus wrapped in CONFIG_CHECKPOINT_RESTORE macro. But code look a bit ugly.
So this patch is an attempt to cleanup do_msgrcv() a bit and make it looks
better.
