Subject: libcgroup issue for EL5 users
Posted by kir on Tue, 30 Oct 2012 16:19:19 GMT

Due to complains that on an RHEL5/CentOS5 system libcgroup package from
OpenVZ utils repository now upgrades the package from EL5, I have
downgraded libcgroup in OpenVZ repo down to 0.37-4.

Note that libcgroup is currently only used by vzctl when it's working on
a non-OpenVZ kernel (i.e. recent upstream kernel like 3.5).

Thanks,
  Kir.
