Hi, I installed recently debian ppc64 bits and I like install openvz in debian.

I followed the tutorial, in the section "install from sources" the Openvz.

fakeroot make-kpkg --initrd ...

Install .deb generated and obtain. Reboot and I go to the kernel openvz but I received this error in the photo attachment.

I'm searching this error but I don't found anything...

Edited and updated /etc/yaboot.conf and exec ybin.

The process to compiled all OK...I don't know...Sorry for my english. Thanks in advanced.
