Hi,

It looks like the latest RHEL 2.6.18 rebase was 2.6.18-308.8.2 from June of this year while the latest RHEL 2.6.18 kernel is 2.6.18-302.20.1

- 1) Is there any ETA on a rebase for RHEL 5 kernels?
- 2) Is there a policy about how often rebasing is done? Is it done only when there's a critical issue or is it done by request?

Thanks & all the best!
