for those of you using openvz on ubuntu 10.04 (i'm currently deciding whether to use centos or scientific on the host for future projects):

i upgraded from vzctl 3.\* to vzctl4.1.1 and found out, that at least vzctl 4.1.1 requires libcgroupl 0.35. lucid only provided libcgroupl 0.34 here the error message

```
vzctl: /usr/lib/libcgroupl.so.1: version `CGROUP_0.35' not found (required by
/usr/lib/libvzctl-4.1.1.so)
```

using 0.37 from ubuntu 12.04 worked for me:
