I have one VPS in VZ Container, when i try to strat the VPS i am getting the error

Start Container "ITFXXX" on "Lin1-115"_:Error invoking external utility: vzctl start XXX failed: Error: Not enough parameters, diskspace quota not set

Let me know what steps to need rectify the above error

Check the .conf file for that container. You likely haven't set a diskspace quota or it's typo'd or something like that.
