Subject: Physical Node Resource Monitoring?
Posted by skatewhale on Sat, 16 Sep 2006 04:53:39 GMT

Anyway to monitor the memory/cpu/disk usage of the physical node? or the total consumptions by the VPS?
Just so that I could decide when the physical node is filled up, and needs to get a new server

Thanks for any help!

Hm,

not shure if that suits your need - but did you have a look at "vzmemcheck [-v -A] " ?

Rgds,
Marco
