Bonjour,

J'essaye d'installer Cgroups sur un container Debian Squeeze ...

Mais j'ai l'impression qu'il manque quelque chose puisqu'à l'installation j'ai ça :

The following partially installed packages will be configured:

cgroup-bin

No packages will be installed, upgraded, or removed.

0 packages upgraded, 0 newly installed, 0 to remove and 29 not upgraded.

Need to get 0 B of archives. After unpacking 0 B will be used.

Setting up cgroup-bin (0.36.2-3+squeeze1) ...

insserv: warning: script is corrupt or invalid: /etc/init.d/../rc6.d/K00vzreboot

Starting cgconfig service: Loading configuration file /etc/cgconfig.conf failed

Cgroup mounting failed

Failed to parse /etc/cgconfig.conf ... failed!

invoke-rc.d: initscript cgconfig, action "start" failed.

dpkg: error processing cgroup-bin (--configure):

  subprocess installed post-installation script returned error exit status 1

configured to not write apport reports

                        Errors were encountered while processing:

cgroup-bin

E: Sub-process /usr/bin/dpkg returned an error code (1)

A package failed to install. Trying to recover:

Setting up cgroup-bin (0.36.2-3+squeeze1) ...

insserv: warning: script is corrupt or invalid: /etc/init.d/../rc6.d/K00vzreboot

Starting cgconfig service: Loading configuration file /etc/cgconfig.conf failed

Cgroup mounting failed

Failed to parse /etc/cgconfig.conf ... failed!

invoke-rc.d: initscript cgconfig, action "start" failed.

dpkg: error processing cgroup-bin (--configure):

  subprocess installed post-installation script returned error exit status 1

Errors were encountered while processing:

J'ai l'impression que le device cgroup n'existe pas ...

Avez vous déjà installé cgroup sur un container ?
