Hi, I'm running a OpenVZ on CentOS (RHEL5, see below).

To install vzctl 4.2-1 I've to resolve some dependences:

vzctl-core x86_64 4.2-1

libcgroup x86_64 0.37-4

ovzkernel x86_64 2.6.18-348.3.1.el5.028stab106.2

vzquota x86_64 3.1-1

Are there any problems known, because so I want to minimize risks. I've searched the net and couldn't find any issues. The system hosts two main servers of the company.

Regards

Dieter

Linux version 2.6.18-164.11.1.el5.028stab068.3 (root@rhel5-64-build) (gcc version 4.1.2

20070626 (Red Hat 4.1.2-14)) #1 SMP Wed Feb 17 15:22:30 MSK 2010

vzctl version 3.0.23
