Hi all,

I am looking at using OpenVZ on a new test project that I am working on. In the documentation I see a kernel list for CentOS 4.2 is 4.4/4.5 supported?

Thanks in advance,
Max

Do you mean whether CentOS 4 update 4 is supported as the host system?
If so, the answer is 'yes'.

Thanks,
Kirill

I am out of the office until Tuesday 26th September 2006.

Please contact our team via the following for any issues relating to a hosting account:

Billing - [billing\[at\]transnexus.com](mailto:billing[at]transnexus.com)

Domain Renewals/Transfers/Registrations - [domains\[at\]transnexus.com](mailto:domains[at]transnexus.com)

Sales - [sales\[at\]transnexus.com](mailto:sales[at]transnexus.com)

Support - [support\[at\]transnexus.com](mailto:support[at]transnexus.com) (24/7)

If you have any queries please contact Damien Ransome via damien@transnexus.com, and for problems with technical support please email Daniel Pop via daniel@transnexus.com.

For anything else I will get back to you as quickly as possible when I return.

Regards,

Andrew Cranson
