Subject: FC5 needs rpm install

Posted by astaka on Sat, 23 Sep 2006 06:38:14 GMT

I try to install OpenVZ in FC5 ,and if I use yum, I'll get error dpendency messages.

If I change to download kernel 2.6.16-1.2133_FC5.026test015.rpm, and use rpm -ivh to install, and I got no problems.

So, if some friends gets the same problems like mine before, plz try rpm installation.

thanks.
