I want to use VPC to control VE, but default VE without X, so I use
"vzyum 101 install xorg-x11*" to install x window.

but I got the error message:

Error: xorg-x11-xfs-utils conflicts with xorg-x11-xfs < 6.99.99.0

what the problem is? and how can I solve this?

thanks...

OK, I exclude this package and I can install it.

jsut use:

"vzyum 101 install xorg-x11* --exclude=xorg-x11-xfs-utils"
